

Chemicals for Wastewater Treatment

DMP Advantages

Customized chemical programs - compliance at the lowest cost

Waste water treatment experts - not boiler and cooling tower technicians

Integrated solutions experts - making chemicals and equipment work together

Solving the Chemical Equation

DMP features some of the strongest chemical minds and technical practitioners in the water treatment industry. Our proprietary chemicals and application experts will help you stay in compliance, keep your plants up and running, and improve both your operations and your bottom line. DMP takes the worry out of wastewater so you can focus on your most critical production priorities.

As an integrated water treatment solutions provider, DMP is uniquely positioned to ensure that your equipment and chemicals work in harmony to keep you in compliance at the lowest cost. DMP has over 40 years of experience using the latest technologies to solve our customers most difficult water problems.
